

Scalable energy storage

Our modular energy system scales from small installations to multi-megawatt deployments, with chemistry matched to the application. Every pack is engineered for contained failure, so faults stay isolated and the asset keeps operating. We build the controls that regulate power from cell to load, and support them with the same team behind the rest of the platform.

Energy
80 kWh - 10+ MWh

Chemistry
NMC, LFP, LTO

Certification
DNV type-certified and USCG approved

Standards
ASTM F3353, ABS Product Design Assessed
